

LINCOLN SQUARE

Project Overview

Client:

GLY Construction

Triad Solutions:

- Survey Project Management
- Construction Survey

Location:

NE 8th Street & Bellevue Way,
Bellevue

Timeline:

2005 – 2007

Project Description:

This 1.4 million square foot mixed-use development combines 300,000 square feet of upscale shopping and fine dining with luxurious hotel and condo living. Top it off with over 540,000 square feet of Class A office space for high-profile tenants. Triad performed topographic and as-built surveys as well as construction staking to help build the tower, skybridge and underground tunnel connecting the Lincoln Square and Bellevue Place parking garages.

Survey Services:

- Horizontal & Vertical Control Monitoring
- Soil Nail Walls
- Construction Layout
- Building Grid Lines
- Floor Grid Lines & Slab Edges
- Foundation & Footings
- Elevator Pits
- Crane Pad
- Curtain Wall
- Roadway & Curb
- Off-site Utility Infrastructure
